BCTEA PSA Professional Collaboration Session

Each year the British Columbia Technology Education Association hosts a PSA Collaboration Session where LSA presidents/district representatives come together to learn the most current initiatives and concerns related to our teaching profession. We have a variety of workshops from various ADST (Technology Education) related stakeholders such as SkilledTradesBC, Construction Foundation, Tech Ed training programs, etc. LSA Presidents/Representatives not only get a chance to hear and learn in these sessions, but they can also share their concerns and assist in goal setting for the BCTEA executive. It is hoped that each school district sees the value of Technology Education and the opportunities our programs provide for students.

This year's professional Collaboration Session will be held on Thursday, October 19th, 2023 in the Comox Valley on Vancouver Island.

President BCTEA
